

Virtual Vendor Forum

Presented by Jason S. Stein
VP, Business Development and Operations
April 23, 2020

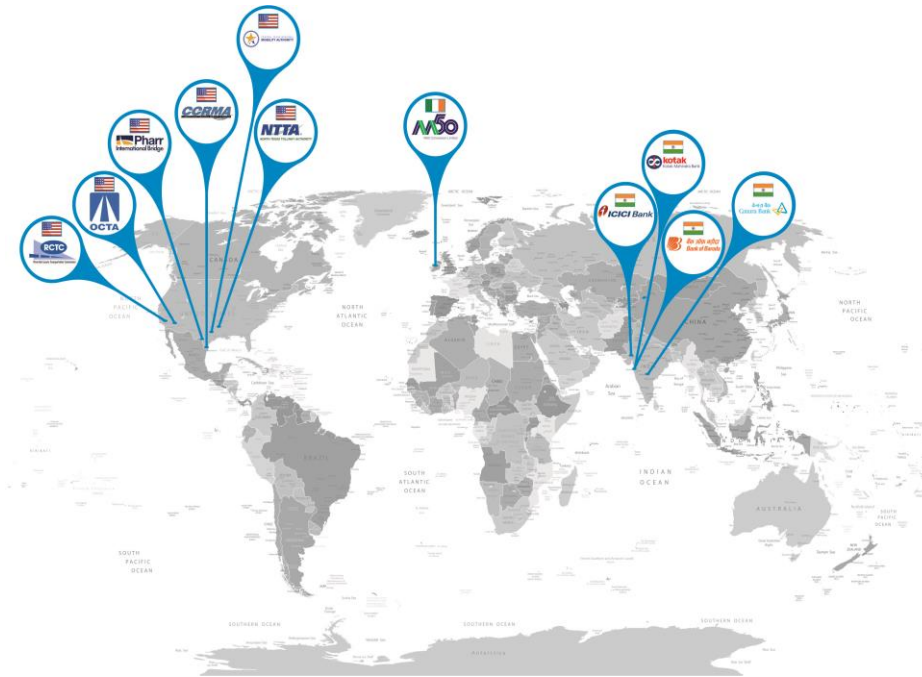

TollPlus Overview:

- ❑ Began as a company specializing in delivery of modern Toll Road Back-Office Systems
- ❑ Currently moving beyond tolling into MaaS / multi-modal transportation
- ❑ We exceed our clients' needs – providing innovative solutions and complementary services – by listening, learning, and co-creating innovations
- ❑ In 2017, VINCI Group took a strategic stake in the capital of TollPlus
- ❑ ISO 9001 & ISO 27001, PCI-DSS, and SOC 2 Certifications

Our Solutions:

Our Global Footprint:

Market Disruptions	TollPlus Recommendations
Health and safety of staff and customers will make agencies lean toward permanent adoption of AET	...specifically designed and implemented for supporting AET and managed lanes
Congestion management may cease to be a strong revenue generator if congestion is significantly reduced or eliminated	...fills operational efficiency gaps with zero revenue leakage
Potential increase in pay by plate transaction volume as more people take to the roads	...dynamic back office system with a robust transaction processing engine using AI/ML/BI image processing algorithms
Customer support moves to a more virtual environment – contactless, cashless, secured, etc.	...CRM module provides the Agency representative with a secured, web-based, modern UI and intuitive design

Our ToP-BOS application meets your Agency's needs!
