

A-to-Be delivers **CityZen**

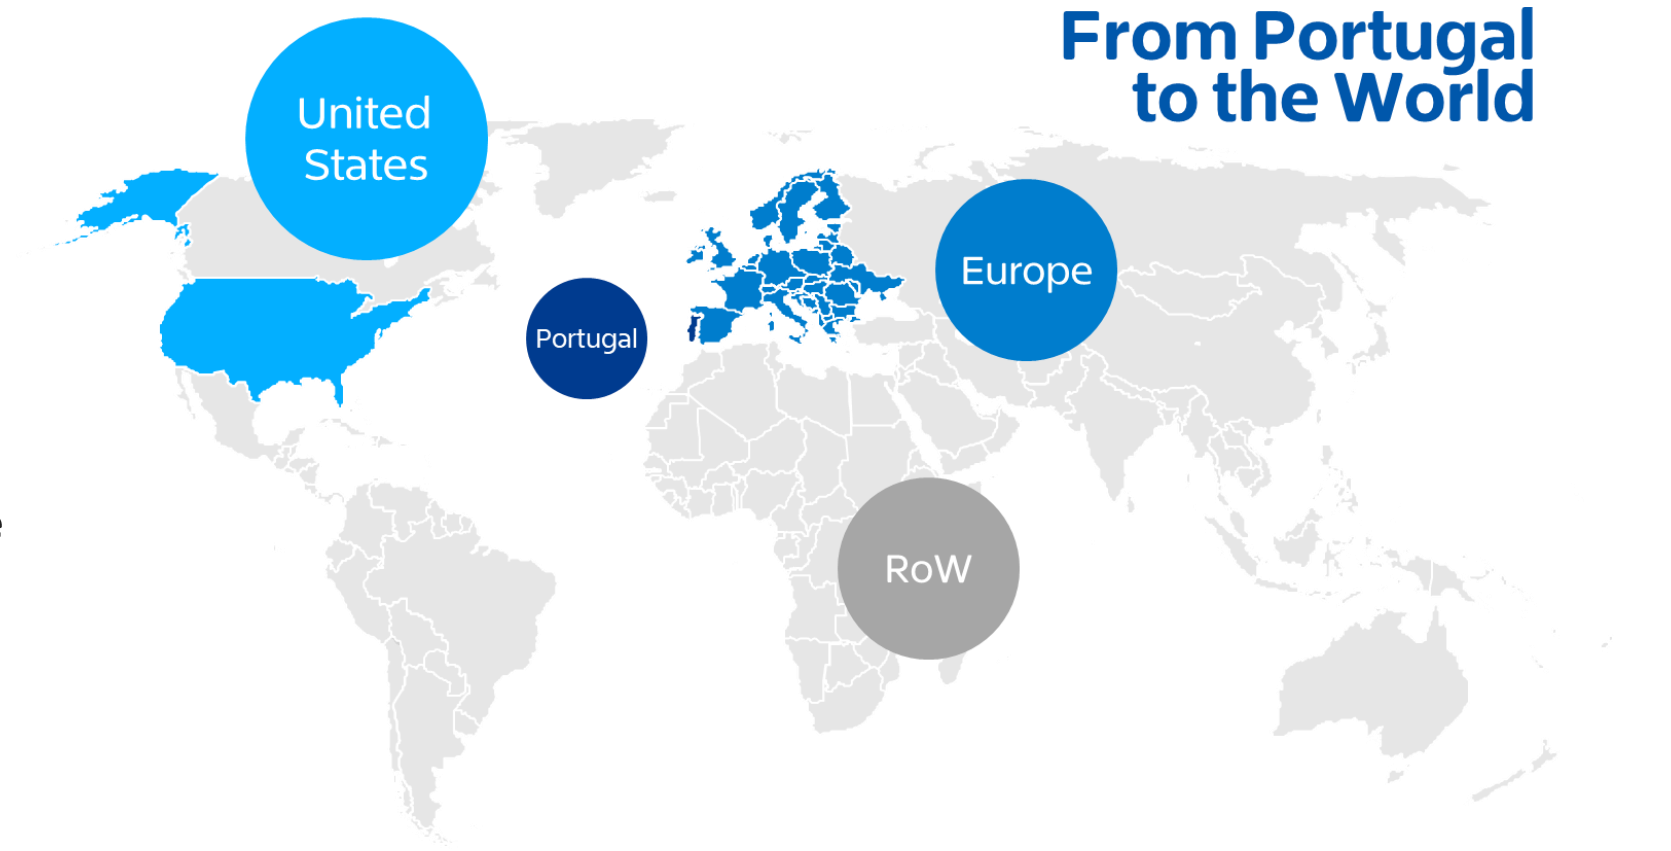

... was born from a **Road Operator** and as a **Tolling Provider**.

+40

years of worldwide experience
starting in Portugal...

... providing complex systems used
to successfully **support and manage**
secure toll collections and superior
mobility experiences.

Today, we are an **international**
player, with our solution deployed
across multiple countries.

The solution

A mobile app solution for integrating mobility

ON-STREET PARKING

Giving the choice to control payments from a mobile app.

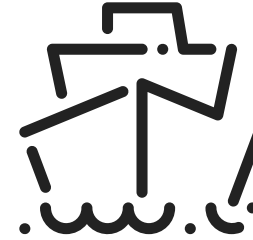

TRANSIT

Allowing validation for using gated areas with restricted access, whether it requires payment or not.

FERRIES

Integrating ticketing for ferries in the same app (or any other mode of transportation).

I manage everything for everyone — customers, operational and managerial staff, payment processors, field resources, official entities, etc.

My web portal allows the CSC operator to gain control of service usage, customer management, support and financial reconciliation.

BACK OFFICE SYSTEM

MANAGEMENT

PAYMENT,
BILLING AND
INVOICING

APP

I can also be the channel with the city, getting information on services and mobility options, support and more.

Citizens will use me to pay parking, gain access to restricted areas, buy tickets for ferries and to show proof of valid transit ticket.

L-A-M
(Local Access
Mediators)

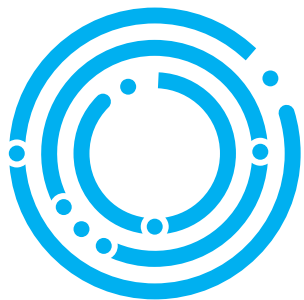

I provide service advertisement (BLE beaconing), receive commands from the app and interact with devices that manage physical access.

You'll find us at the gates. A-to-Be staff will do the maintenance and installations, always available for support.

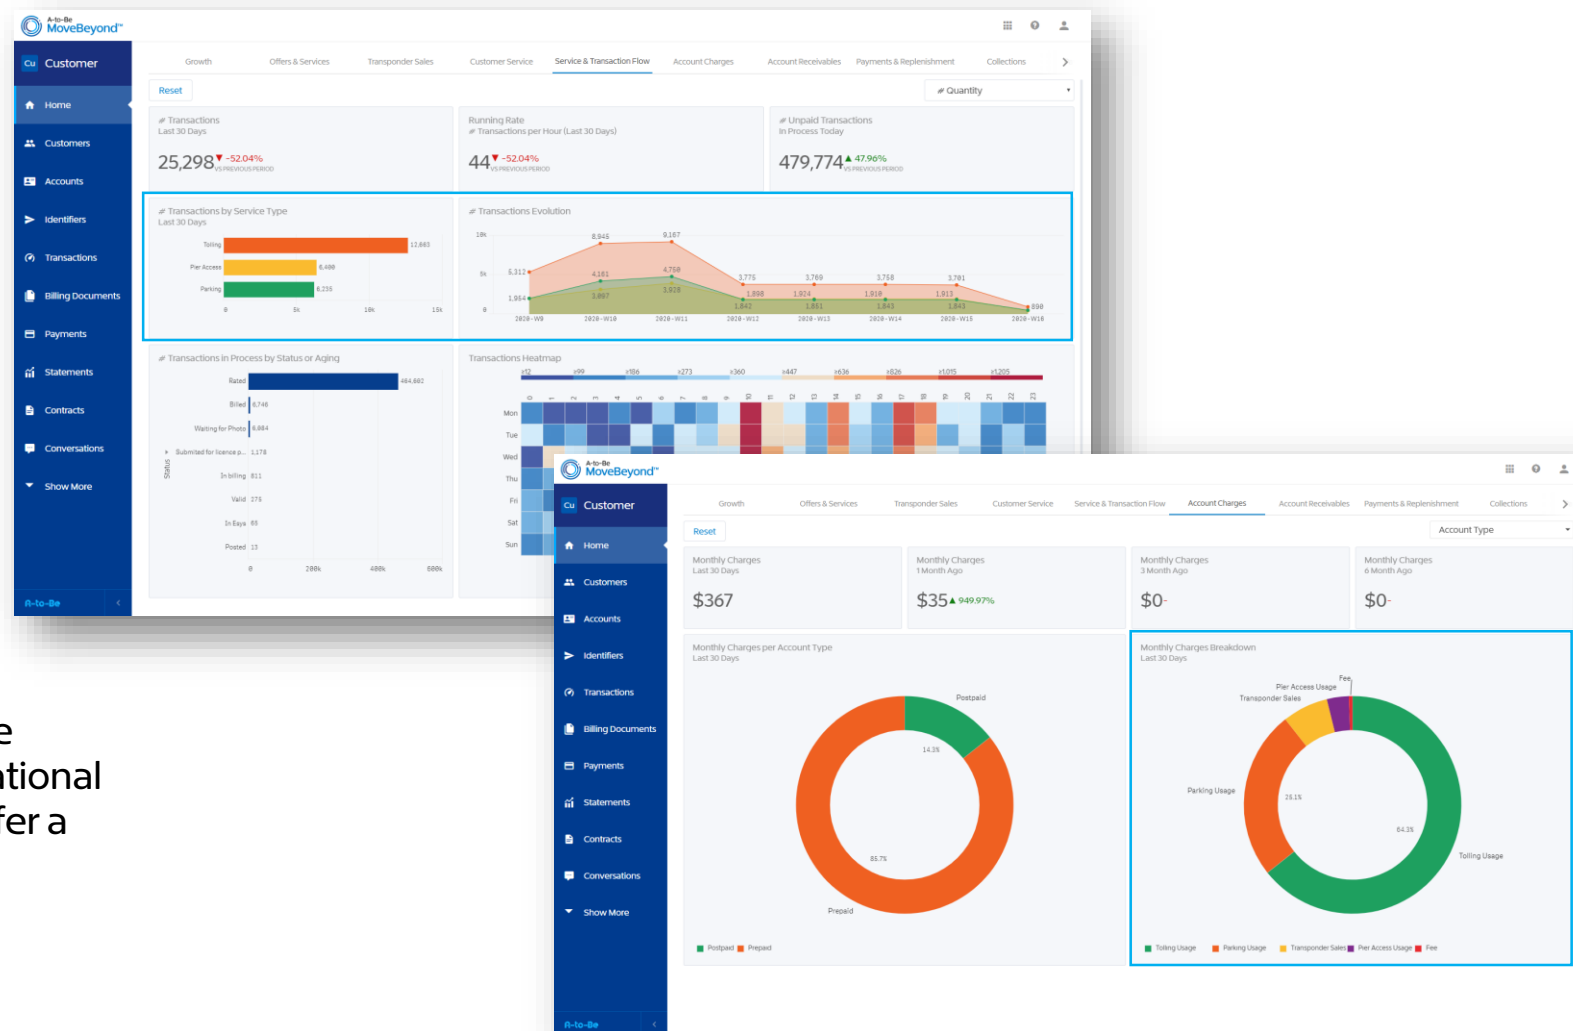

The Back Office

A-to-Be MoveBeyond Tolling and Mobility Back Office

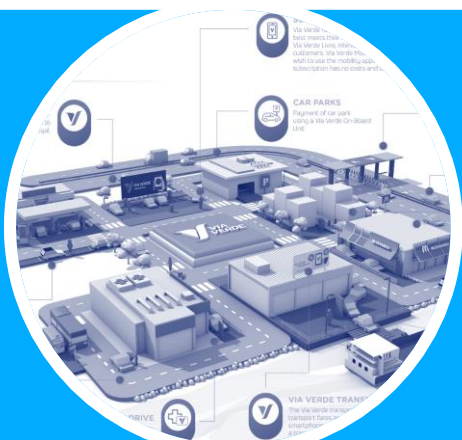

A-to-Be
MoveBeyond
Back Office Platform

A back office platform to deliver **mobility experiences and payments** across multiple services, **including tolling**. Combines operational excellence with commercial reliability to offer a **seamless user experience**.
