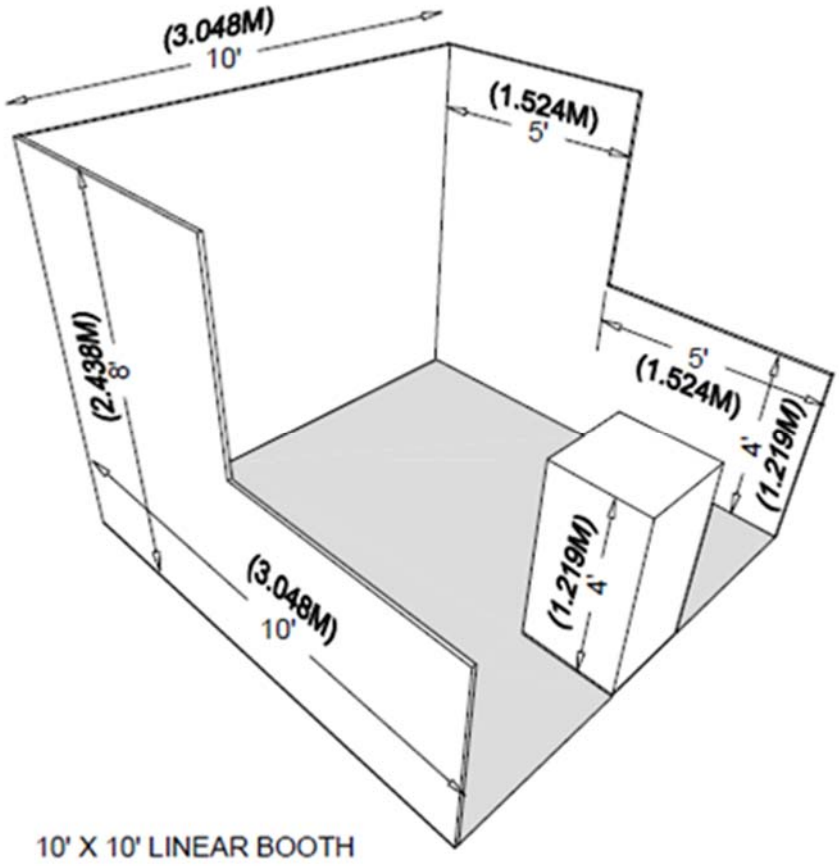
Standard Rules for In Line Booths

In Line Booth (per floor plan all booths are in-line)



This image and description are for illustrative purposes only.

Definition: A Linear Booth has only one side exposed to an aisle and has at least one adjacent neighbor on either side of the booth. They are also called "in-line" booths.

No exhibit construction or signage may exceed 8' in overall height. The maximum height of 8' is permitted on the back 5' section and a maximum height of 4' is permitted on the front 5' section. Please reference the diagram above for allowable configurations.

Note: When three or more Linear Booths are used as a single exhibit space, the 4' height limitation is applied only to that portion of exhibit space which is within 10' of an adjoining booth.

A **Corner Booth** is a Linear Booth at the end of a series of Linear Booths that is exposed to aisles on two sides. All other guidelines for Linear Booths apply.

Hanging Signage: Hanging ceiling signs is ***not*** permitted in a Linear Booth.
