

TECHNOLOGY SUMMIT PROGRAM

ORLANDO, FL

March 19-22, 2022

HOSTED BY

IBTTA
TOLLING. MOVING SMARTER.

WELCOME TO ORLANDO!

Welcome IBTTA Delegates! I'm so excited to be here and to see YOU at the 2022 IBTTA Technology Summit!

The Technology Summit promises to be a productive and rejuvenating conference as we gather to learn about the technologies and trends affecting our industry now and in the future.

For my IBTTA presidency this year, I chose the theme "Resilience, Leadership and Opportunity." I will say more about this in my opening remarks on Monday. But suffice it to say that I'm a big believer in the importance of these values and how they help us grow individually and as an industry.

That we are even able to gather in-person this week—for only the second time in more than two years—is a testament to the resilience of you and the entire IBTTA family.

The Technology Summit program highlights some of the best examples of leadership in our industry—in interoperability, artificial intelligence, automated vehicles, safety, electrification, mobility as a service, and so much more. In short, if you're looking for leadership in tolling and transportation, you've come to the right place.

As for opportunity, I'll leave that to you. Whether it's during the educational sessions, networking events, in the exhibit hall, or anywhere else here at the Renaissance, I know the interactions that happen at this event will ripple out in the form of new ideas, new relationships, and new investments long after the program closes on Tuesday afternoon.

On behalf of the entire IBTTA family, I hope that this Technology Summit is the beginning of something great for you and your organization.

Diane Gutierrez-Scaccetti

Commissioner

New Jersey Department of Transportation

IBTTA President

CO-CHIEF MEETING ORGANIZERS

 **Sue Chrzan**

Director of Public Affairs &

Communications

Tampa-Hillsborough Expressway Authority

Tampa, FL

 **Jim Wilson, PMP**

Southeast Tolls Program Director

TransCore LP

Orlando, FL

ABOUT OUR HOSTS

The Central Florida Expressway Authority (CFX) is an independent, locally controlled toll agency that is responsible for construction, maintenance and operation of a 125-mile limited access expressway system that serves more than 3 million residents and an estimated 75 million annual visitors in Brevard, Lake, Orange, Osceola, and Seminole counties. CFX is committed to operating a world-class mobility network that advances economic prosperity and quality of life. That's why CFX is preparing now for automated, connected, electric, and shared mobility technologies with future-ready infrastructure and customer-first transportation solutions.

Florida's Turnpike Enterprise is responsible for the management of the 511 centerline miles of the Florida's Turnpike System, which includes the Turnpike mainline and 11 expansion projects spanning 20 of the most populous counties throughout the State. The Enterprise also serves as the state's toll collection operator and collects tolls on 12 facilities owned or operated by the Florida Department of Transportation, such as Alligator Alley, the iconic Sunshine Skyway and express lanes in South Florida, Jacksonville and now, Orlando. In addition, Florida's Turnpike Enterprise processes tolls for counties, expressway authorities and for private toll operators. In total, the Enterprise touches 85% of the toll transactions generated in the State of Florida.

HOTEL INFORMATION

Renaissance Orlando at SeaWorld
6677 Sea Harbor Drive
Orlando, FL 32821
Phone: (407) 351-5555

BADGES: Badges are required to gain entry into all sessions. In consideration of other attendees, please wear your name badge to all scheduled functions.

CERTIFICATION: IBTTA will forward a certificate of attendance to all who sign the attendance form at the IBTTA registration desk.

CERTIFICATION/PROFESSIONAL DEVELOPMENT HOURS: IBTTA recognizes the need for professional engineers and planning professionals to demonstrate continuing professional competency in their respective fields and earn certification maintenance (CM) credit or professional development units (PDU). IBTTA will provide interested attendees with a certificate of attendance following the workshop..

COMPETING EVENTS: It is against IBTTA policy for other organizations to schedule events or meetings during the program.

CONSIDERATIONS: During the meeting, please silence all cellular phones and take side conversations outside of the room.

DRESS: Business or business casual is encouraged for all sessions.

LEADERSHIP ACADEMY ALUMNI:  This designation reflects an alumnus of IBTTA's Leadership Academy. You'll see this designation throughout the program.

MEDIA: Members of the media are permitted to attend sessions only.

MEETING APP:

GET THE IBTTA MEETINGS APP

Scan this QR code with your smartphone to download the IBTTA Meetings app

MEMBER PUBLICATIONS AND COLLATERAL: All members of IBTTA are welcome to place their publications in the registration area.

PRESENTATIONS AND VIDEO RECORDINGS: Presentations authorized for distribution will be available to IBTTA members only on IBTTA's website within two weeks following the meeting.

REGISTRATION FEES AND EVENT TICKETS: Delegate and Speaker fees include all meals, functions and sessions. Tickets may be available to evening and other events.

SATISFACTION SURVEY: Please help IBTTA improve future meetings by completing the survey that will be emailed to you following the conference.

SPECIAL ACCOMMODATIONS: If you need special accommodations to fully participate in IBTTA events, please notify the staff at the IBTTA registration desk.

SPONSOR/EXHIBITOR INFORMATION: Please support our generous sponsors and exhibitors by reviewing the Sponsor and Exhibitor section of this program and spending time in the Exhibit Hall.

VIRTUAL ACCESS: IBTTA will offer a Live-stream of all General Sessions listed on the agenda on Monday & Tuesday. To participate and learn more, register at ibtta.org/Orlando.

HEALTH & SAFETY

Full Covid-19 Vaccinations are required to attend the meeting. Masks are suggested in all meeting space.

WI-FI

Network Name: IBTTATech

Password: CSG2022

Meeting WiFi is sponsored by: 

ABOUT IBTTA

The International Bridge, Tunnel and Turnpike Association (IBTTA) is the worldwide association for the owners and operators of toll facilities and the businesses that serve them. Founded in 1932, IBTTA has members in 20 countries on six continents. Through advocacy, thought leadership and education, members are implementing state-of-the-art, innovative user-based transportation financing solutions to address the critical infrastructure challenges of the 21st Century.

TECHNICAL TOUR & EVENING EVENT

TECHNICAL TOUR: SUNTRAX AMERICA'S CENTER FOR TRANSPORTATION INNOVATION

Sunday, March 20, 2022 | 8:15am - 12:30pm

Fee: \$40 per person

- Tour is open to registered delegates.
- Limited to 200 attendees.

*This tour includes some walking. **Participants are required to wear closed toe shoes.** Tour will take place rain or shine.*

Florida's Turnpike Enterprise is hosting an exclusive tour of the SunTrax Innovation Facility. If you joined the 2019 tour, you'll be excited to see how much has been accomplished since then. Located off I-4 between Orlando and Tampa, SunTrax is a large-scale, cutting-edge facility developed by the Florida Department of Transportation and Florida's Turnpike Enterprise, dedicated to the research, development, and testing of emerging transportation technologies in safe and controlled environments. Come see the site's advanced infield capabilities and how its transforming transportation, tolling, and autonomous vehicle testing in North America. Learn more about SunTrax (www.suntraxfl.com)!

EVENING EVENT: TIN ROOF

Monday, March 21, 2022 | 6:30pm - 9:30pm

Buses depart at 6:15pm from the hotel.

Fee: included in registration; tickets for non-registered attendees will be available at the IBTTA registration desk.

Join your friends and colleagues for great food, drinks, and fun tonight. We have three spaces for you to enjoy, including a spin on the Ferris Wheel if that suits you! Don't forget to request your favorite song with the DJ inside, and make sure to thank our friends at Duncan Solutions, Inc., eX² Technology and HDR for sponsoring all the fun.

REGISTRATION

9:30am - 11:00am

(Oceans 3-4)

BLOCKCHAIN TECHNOLOGY WORKSHOP

(limited attendees)

This working session will identify applications and/or solutions suited for distributed ledgers and other blockchain technologies, determining your best way to approach procurement. This session has a limited number of attendees.

FACILITATOR:

Matt Milligan, Managing Partner, Milligan Partners LLC, New York, NY

 **Rafael Hernandez**, Vice President, National Practice Leader, Kyra Solutions, Inc., Lakeland, FL

 **Bob LaGatta, P.E.**, Project Director, ITS/Tolling, Atkins N.A., Charlotte, NC

Yufan Luo, Data Analytics, Milligan Partners LLC, Dallas, TX

 **Tyler Milligan**, Managing Partner, Milligan Partners LLC, Dallas, TX

10:30am - 12:30pm

(Oceans 1-2)

LOST REVENUE TASK FORCE MEETING

Open to everyone

This will be a working meeting of the Lost Revenue Task Force, open to all delegates. There will be presentations and roundtable discussions following the working meeting.

CO-FACILITATORS:  **Jessica Carson**, Director of Operations, E-470 Public Highway Authority, Boulder, CO and **Mark Muriello**, Director of Policy & Government Affairs, IBTTA, Washington, DC, Co-Chairs, Lost Revenue Task Force Committee

11:00am - 1:00pm

ROUNDTABLE

(Labrid/Mako, 2nd Floor)

EXECUTIVES ROUNDTABLE WITH LUNCH

By invitation

This roundtable is exclusively for the chief staff executive of a toll agency, authority, or concession. Only one individual per organization may attend. This is a great opportunity to discuss thorny issues in a quiet, off-the-record setting with your colleagues.

FACILITATOR: **Diane Gutierrez-Scaccetti**, Commissioner, New Jersey Department of Transportation and President, IBTTA, Trenton, NJ

11:30am - 1:00pm

YOUNG PROFESSIONALS COUNCIL

(Oceans 3-4)

YPC EVENT: TOLLING 102

Open to everyone

Join the Young Professionals Council for a follow up to previous Tolling 101 sessions. With a focus on roadside technology, Tolling 102 attendees will learn more about the devices in use today, the cutting edge of current technologies, and the future of roadside tolling technology.

MODERATOR:  **Jason McCartney, P.E.**, Project Manager, Gannett Fleming, Philadelphia, PA

James Bird, Senior Field Technician, Red Fox ID Limited, Buckinghamshire, United Kingdom

Robert Kopelk, Consultant, Silicon Transportation Consultants, Palo Alto, CA

 **Chelsea Scheid, P.E.**, Toll Facility Engineer, Atkins N.A., Ocoee, FL

INTERVIEWER: **Heather Henck, P.E.**, PTOE, Manager, RK&K, Baltimore, MD

SPECIAL GUEST: **Joe Waggoner**, former Executive Director, THEA and IBTTA Honorary Member, Tampa, FL

1:00pm - 2:30pm

(Oceans 1-2)

WOMEN IN INNOVATION

Open to everyone

The Women in Tolling Council connects women in tolling globally and supports diversity in leadership. During this session, the Women in Tolling present a new event – *Women in Innovation*, featuring a one-on-one interview with one extraordinary woman who has made an outstanding contribution to the global transportation industry.

MODERATOR:  **Terri Slack**, Vice President, National Toll Program Manager, CDM Smith, Pittsburgh, PA

GUEST: **Laura Chace**, President & CEO, ITS America, Washington, DC

3:00pm - 4:30pm

(Oceans 1-2)

PROCUREMENT MEETING

Open to everyone

Come participate in an interactive discussion as representatives from the public agency, vendor and consulting worlds have a frank and open discussion on the public procurement process in the toll industry. The conversation will go where the audience takes it and we will all learn new ways to improve this age-old process!

FACILITATOR: **Matt Ringstad, P.E.**, Tolling Consultant Program Manager and NW Region Transportation Manager of Projects, Jacobs Engineering Group, Seattle, WA

Susan Buse, President, SBuse Consulting, Dallas, TX and IBTTA Past President

Vickie Dewey, Global Innovation Lead for Transportation Pricing, AECOM, Orange, CA

Scott Doering, Vice President and General Manager, Road Usage Charging, Conduent Transportation, Newark, NJ

Mike Hancock, Tolling Operations Manager, E-470 Public Highway Authority, Aurora, CO

Samuel Johnson, CEO, Transportation Corridor Agencies, Irvine, CA and IBTTA Past President

Michael Pellegrino, Business Development Director, Shimmick, Sunrise, FL

 **Jim Wilson**, PMP, Southeast Tolls Program Director, TransCore, LP, Orlando, FL

3:00pm - 4:30pm

COMMUNICATIONS ROUNDTABLE

(Oceans 3-4)

COMMUNICATIONS UNSTUCK: HOW TO KEEP THE INFORMATION MOVING WHEN DISASTERS TRAP MOTORISTS

Open to everyone

Recent unexpected and disastrous winter storms—from Texas to Kentucky to Virginia to Athens, Greece—have caught agencies off guard and left many motorists stranded in their cars overnight. Previous seasons also have seen roads close unexpectedly due to wildfires and floods. Communicating essential information about these increasingly occurring incidents is vital. Customers, the media, community members, other stakeholders, and even your own employees are just a few of the stakeholders that need information – information that could make the difference in saving lives, reducing injuries, and opening roadways sooner. For communications professionals, the challenges of getting the correct messages out include combating misinformation from the press and on social media. How can you strategize for these types of crisis communications in advance and create a contingency/crisis PR plan? How do you get the word out to everyone, especially those stranded drivers? How do you monitor and inform the press with the most up-to-date information? How do you keep your internal communications team motivated during an around-the-clock response? This session will explore lessons learned from the recent incidents and examine elements of an effective communications response strategy for unforeseen, large-scale events.

MODERATOR: Cheryl Sparks, Chief Strategy Officer, Maryland Department of Transportation, Baltimore, MD

Ellen Kamalakis, Senior Public Affairs Officer, Virginia Department of Transportation, Fairfax, VA

Konstantinos Koutsoukos, President, HELLASTRON and CEO, Egnatia Odos Tollway, Athens, Greece

Renee Colborn, Public Information Manager, Pennsylvania Turnpike Commission, New Stanton, PA

Samrat Valani, Senior Director, Asset Operations, Transurban, Alexandria, VA

4:30pm - 6:00pm

NATIONWIDE INTEROPERABILITY: AN INDUSTRY UPDATE

IBTTA members continue to work toward the goal of nationwide electronic tolling interoperability. Technological advances, potential new partnerships, and innovative business practices are figuring into the shape of future tolling interoperability. This session will provide an overview of the ongoing work of the U.S. toll interoperability regions to advance regional solutions and hubs and to integrate them at a national scale. Updates will be provided on work underway to address the emergence private account managers, the activity of private toll operators and concessionaires, updated business rules, financial payment and settlement processes, transponder ID governance, and communications and customer information.

Sponsored by:

AET CONVERSION – THE GOOD, THE BAD, AND THE UGLY

No matter what you call it—cashless tolling, contactless tolling, unattended tolling, license plate tolling—all-electronic tolling (AET) is a big part of the tolling industry today that's poised to get even bigger. However, as widespread as this technology has the potential to become, no two conversions from traditional cash tolling to AET are the same. Presentations are from organizations who have already navigated the transition to AET, to highlight the best practices and lessons they can share. The session will focus on everything that impacts a conversion to AET—your pain points, the things you wish you had done differently, the things you wish you had known earlier in the trip toward AET and the things that went better than expected.

APPLICATIONS OF ARTIFICIAL INTELLIGENCE

While machine learning and computer vision may sound like phrases from science fiction, over the last several years these technologies have become a more prominent part of reality for numerous industries, including transportation. Presenters from the public and private sectors will discuss the latest innovations and use cases for machine learning and computer vision within the tolling and transportation industry with a focus on how these technologies have been, or can be, used to improve customer service, fulfillment, back-office operations, congestion management, road safety, payment processing, image recognition, compatibility with autonomous and connected vehicles, and any other aspects of today's tolling operations.

DATA IS GETTING SMARTER. ARE YOU?

Smart data is data that cuts out the analytical middleman and provides actionable insights in real time. Instead of a spreadsheet full of historical data that needs to be pored over and plotted to make sense, smart data relies on sophisticated algorithms to identify trends and patterns right away. Presenters will explore the potential this data has for the tolling industry—how it can be deployed to better manage roadways, increase safety for road users, reduce congestion and increase customer satisfaction all with the click of a button.

EXPANDING AND KEEPING UP WITH BACK-OFFICE SYSTEMS

Today's back-office systems must do more than simply store local data. The best of them relies on technology to improve customer service, minimize the impact of disruptions, and accomplish business objectives. Back-office systems today are a gold mine of information and can offer real-time data that organizations can use to identify anomalies and make decisions faster than ever before. This session will explore the latest in back office-related topics including blockchain technology, self-service technologies, transaction processing and the use of e-wallets, outsourced customer service centers and other subjects else that help organizations to leverage their back office to solve problems and mitigate challenges.

SAFETY FIRST: GETTING TO VISION ZERO

Vision Zero is a global road safety movement aiming for nothing short of the total elimination of fatalities and serious injuries on the world's roadways. Achieving zero traffic deaths means addressing all aspects of safety and creating a holistic approach with layers of protection for all road users—pedestrians and drivers, but also roadway workers, roadside safety patrols and services and everything in between. Presentations will focus on deploying new technologies to make roads safer by implementing performance-driven safety management practices and innovative safety countermeasures. Join this session to learn how tolling organizations can build cultures of safety for all of their operations, and how efforts to increase road safety and achieve Vision Zero.

AUTOMATING YOUR WORKFORCE

Every public agency is wrestling with the challenge of identifying, attracting, hiring, and retaining top talent. Part of the process of using all the technological advances available to the tolling industry will be making sure the right people are in the right positions when those solutions are implemented so that they have the intended results. Discussion will focus on how today's labor challenges have taken shape in the tolling and transportation industries, where the needs are greatest throughout the tolling industry and, most importantly, novel strategies for how organizations and agencies can find, hire and keep the right people on board to continue pushing the industry into the future.

MAAS: THE BIG PICTURE FOR THE TOLLING INDUSTRY

Urbanization is increasing and a driver's license is no longer a prerequisite for the freedom to move. As such, the concept of Mobility as a Service (MaaS) has grown increasingly relevant as both a response to, and influence on, the growing portion of the traveling public using shared, and often multi-modal, means of transportation rather than relying solely on private cars. Where do toll operators fit into this picture? Presenters will discuss the potential impact MaaS will have, where MaaS is headed and how the tolling industry will contribute to improved mobility worldwide.

HOW DO YOU HARNESS NEW TECHNOLOGIES TO EXPAND THE INDUSTRY?

Future proofing and innovation are not new concepts. Perhaps the speed has changed, but there have always been innovators that have moved progress forward. The goal of this panel discussion is to harness the benefits of the experience of successful innovators, to have a discussion of innovations currently in process and to engage the vision of today's innovators. The audience won't hear any "pushing" of specific products, but more the why and how of successful innovation implementation. The Moderator has had a long career, most of it in the role of innovator, in a quest to future proof the next 20 years of technological changes. Now, the success or failure of those innovations can be established. The discussion will be a mix of experiences, new and old, to help the audience guide their own visioning for future proofing. What worked, what didn't, what were the obstacles and what was the importance of perseverance. Come join the conversation!

AGENDA

1:00pm – 2:30pm

GENERAL SESSION

(Crystal Ballroom)

ELECTRIC VEHICLE INFRASTRUCTURE AND THE FUTURE OF ROADWAY ENGINEERING

The hour will soon be here when electric vehicles (EVs) outnumber gas-powered vehicles. The widespread adoption of EVs—which are cleaner, but also markedly heavier than their gas-powered counterparts—will fundamentally change how roadways are designed, engineered, built, operated, and maintained. Planning for new EV infrastructure like high-speed charging stations, EV-ready rest stops and electrified roads will become the norm for road design, planning, construction, and management but what stage are we in now? Presenters will explore EV-centric roadways, how existing assets can be repurposed to meet the needs of the EV future and what the tolling industry can do to, quite literally, not get left by the side of the road as EVs become a dominant force on the nation's roadways.

MODERATOR: Jeff Kupko, P.E., PTOE, Senior Associate, Assistant Program Manager, Michael Baker International, Westerville, OH

EV Solution: Charging Cars as They Drive Our Roads

A-to-Be

Powered by  Brisa

A-to-Be is a technology provider responsible for the development and deployment of advanced tolling and mobility solutions across global transportation markets. Part of Brisa Group (the largest private road operator in Portugal) and with a U.S. subsidiary based in Illinois, A-to-Be is an international company with solutions deployed across multiple states, countries and continents. For over 40 years, A-to-Be has provided leading end-to-end tolling solutions, covering from roadside to backoffice and all the different tolling modes, including RUC. Today, we are enablers of integrated mobility experiences through a backoffice platform which supports a single mobility account. We also provide solutions to reduce congestion, such as Managed Lanes and Congestion Pricing. With billions of annual transactions and travelers using our systems internationally, we build innovative solutions, with exciting research lines. Our technologies drive mobility forward. www.a-to-be.com

Bestpass is the comprehensive payment platform provider and leader in toll management solutions for commercial fleets of all shapes and sizes. With more than 20,000 customers and processing more than \$1.2 billion in toll transactions in the United States and Canada, Bestpass ensures data accuracy, consolidates payments, delivers invaluable industry expertise, and saves its users time and money. Founded in 2001 by truckers for truckers, Bestpass is now a trusted partner on the road and in the back office for customers, tolling authorities, and related organizations. www.bestpass.com

BLISSWAY provides next-generation roadside tolling infrastructure deployable in weeks and at zero upfront cost to agencies. www.blissway.com

CDM Smith provides lasting and integrated solutions in transportation, water, environment, energy and facilities to public and private clients worldwide. As a full-service engineering and construction firm, we deliver exceptional client service, quality results and enduring value across the entire project life cycle. CDM Smith provides expertise in toll finance, technology and operations, providing all levels of traffic and revenue studies, feasibility analyses, risk assessments and project management for public and private clients. We also help clients in their procurement processes for toll technology, operating contracts and P3 development agreements. With 65 years of commitment to the transportation industry, CDM Smith has the thought leadership and experience to assist clients in implementing new facilities and improving existing operations, whether converting to all-electronic toll collection, implementing HOT lanes, upgrading equipment or managing organizational change. www.cdmsmith.com

With nearly 30 years experience, Conduent Transportation has a proven record of leadership in the tolling industry, delivering innovative technology-agnostic business solutions. We partner with our agency clients to promote mobility, reduce congestion and pollution, modernize payment options, and enhance traveler journeys. Our innovative solutions improve quality and efficiency while reducing costs and generating sustainable funding opportunities for transportation and other initiatives. Our history supporting key tolling programs alongside our continuous innovation has put Conduent Transportation at the forefront of the industry making us one of the largest electronic toll collection and back-office solution (BOS) providers in the U.S. We have extensive experience designing, installing, operating, maintaining, and delivering integrated toll solutions, including roadside solutions, back-office systems, automated license plate recognition (ALPR), dynamic toll pricing, vehicle occupancy detection, all electronic tolling (AET) lanes, operations and maintenance, and customer service centers (CSCs). www.conduenttransportation.com

SPONSORS & EXHIBITORS

Cubic Transportation Systems, Inc. is a leading integrator of payment and information technology and services for intelligent travel solutions. We deliver integrated systems for transportation and traffic management, including a next-generation, tolling back office system. We're uniquely positioned between traditional tolling, road user charging suppliers and large payment processors. At Cubic, we believe our identity is intrinsically linked with our customers and the people our customers serve. How they get from one place to the next – how that impacts their lives, their fellow travelers and their cities – and how it feels along the way. That is why we are passionate about developing transportation solutions that improve the way we move throughout cities. Innovation is in our culture, and our 45-year history speaks for itself. We've delivered state-of-the-art public transit and traffic management system to over 450 operators in major cities and four continents. We are getting you there. Smarter.

www.cubic.com/solutions/transportation/tolling

Emovis is the prime technology and operations service provider of the Abertis Group for toll-based mobility solutions. The company is currently operating some of the world's busiest cashless toll roads including Montreal's A25 Highway and Liverpool's Mersey Gateway bridge. In 2017, the company converted Puerto Rico's Metropistas Highway Network into an All Electronic Tolling (AET) highway network. Emovis is also pioneering new mobility pricing solutions for mileage-base user-fees (MBUF), low-emission zones, and congestion. The company is currently a Commercial Account Manager in Oregon's Road User Charge program (OreGo), which is the first ever MBUF program implemented in the United States. Emovis won the Washington RUC (WARUC) pilot in 2017 and the UDOT Road Usage Charge project in 2019 with the objective of providing a fair and efficient funding solution for transportation departments with declining fuel tax revenues.

www.emovis.com

ETC is a leading U.S. intelligent transportation systems provider, developing and delivering best-in-class solutions for tolling, congestion management, urban mobility, and multimodal transportation needs. ETC's passionate and innovative team has been driving the future of mobility since 1999, with a number of industry firsts, including all-electronic tolling (AET), dynamic pricing, agency interoperability, hosted mobility solutions and machine learning. For over two decades, ETC has delivered sophisticated solutions to many of the largest toll authorities in the U.S., including statewide programs, county networks and tolling-specific authorities. ETC's solutions process over two billion transactions annually, totaling over \$3 billion in revenues for our customers, incorporating the latest in evergreen open-source and SaaS technologies and Big Data architecture through our innovative riteSuite™ products. www.etc.com

For over 100 years, Gannett Fleming has shaped transportation infrastructure, connecting people and communities around the world. We provide clients with extensive transportation advisory, planning, design, and construction management services. With an eye on innovative strategies to improve systems and financial sustainability, Gannett Fleming works with clients to address today's challenges and advance future mobility. With expertise in tolling and other pricing systems, we help define, deliver and test electronic, open-road, variable and dynamic systems. Additionally, our concepts and solutions help reduce administrative burden, accelerate projects, provide a single point of responsibility, and, in some cases, achieve faster revenue collection for owners. Gannett Fleming's entire team works together to deliver excellence to every project, every day. www.gannettfleming.com

Our employees, working in 225 locations around the world, push open the doors to what's possible each and every day. Well known for providing innovative Intelligent Transportation System (ITS) components to transportation projects, HDR has invested and created an unparalleled group focusing on the next-generation of ITS, tolling and revenue replacement solutions. With our expert help, you can successfully navigate the transportation technology landscape — from concept to deployment and adoption. www.hdrinc.com/markets/transportation/highways-roads

HNTB Corporation provides more than 50 specialized services to the tolling industry, ranging from financial planning and analysis to operations and management and priced managed lanes, networks and corridors which are growing in popularity across the country. The firm has assembled a team of internationally recognized experts to help transportation agencies achieve a balance among design, technological, operational, budgetary, scheduling and aesthetic concerns — ensuring toll programs are safe, compatible and economical for the communities they serve. Services can be tailored to support all toll organizations — from start-ups to emerging and mature programs. HNTB, providing more than a century of infrastructure solutions, is proud to serve as the No. 1 consultant to toll authorities, agencies and their partners across the United States of America. www.hntb.com

IBI Group is an international leader in the application of technology in transportation. Working as a system integrator or as an owner's representative provides IBI Group with a unique perspective in the implementation of complex transportation technology projects. The firm was founded in 1974 and has grown steadily to its current international operations in Canada, the United States, Europe, the Middle East and Asia. www.ibigroup.com

IBM has been at the forefront of technology for over 100 years, leading industries across the world through major transitions, generation after generation. For tolling, IBM's work started with the opening of Pennsylvania Turnpike, and our technology enabled accurate revenue collection, establishing best practices for the industry that continue to this day. For over 20 years IBM has led congestion charging programs for London and Stockholm and implemented back-office systems that today are processing more than 1.7 billion transactions around the world. Moving forward, IBM is leading the way, with connected vehicle platforms, multi-modal trip planning, mobile tolling, blockchain, artificial intelligence, and more to help our clients stay at the forefront of technology. See how your agency can put smart to work with IBM! www.ibm.com

Kapsch TrafficCom is a globally renowned provider of transportation solutions for sustainable mobility. Our innovative solutions in the application fields of Tolling, Traffic Management, Demand Management and Mobility Services contribute to a healthy world without traffic congestion. We have brought projects to fruition in more than 50 countries around the globe. With our one-stop solutions, we cover the entire value chain of our customers, from components to design and implementation to operation of systems. www.kapsch.net

We specialize in the art and science of digital transformation in government, with a focus on Transportation and Tolling programs. As a trusted partner with decades of award-winning service and delivery, we offer simple, innovative solutions to better connect government with its citizens and community partners. We understand the ever-increasing challenges facing transportation agencies and leverage our industry expertise to create targeted cloud, mobile, and enterprise business process solutions which reduce risk, increase ROI, and improve the quality of citizen engagement. Together, let's build an even better community. www.kyrasolutions.com

Michael Baker

INTERNATIONAL

Michael Baker International is a leading provider of engineering and consulting services, including design, planning, architectural, environmental, construction and program management. The company provides its comprehensive range of services and solutions to support U.S. federal, state and municipal governments, foreign allied governments, and a wide range of commercial clients. Michael Baker understands the time constraints of toll clients, with a proven track record of providing General Consulting Engineering and Managed Lane design services by consistently delivering high-end, professional engineering and integrated management solutions. Michael Baker's experience with tollway systems, including HOV and HOT, encompasses the planning, design, and construction of new and rehabilitated tollway systems and elements, including highways, bridges, Intelligent Transportation Systems (ITS), connected and autonomous vehicles, and communication systems. www.mbakintl.com

Milligan Partners is a creative team of technologists and management consultants. We make a positive impact through teamwork and innovation. With integrity and a holistic approach to problem solving, we help our clients design solutions that improve their operations and allow them to better navigate the challenges of tomorrow. Our work focuses on the public sector and transportation services. www.milliganpartners.com

Since 1995, Shimmick's O&M team has provided operations and management excellence in supporting tolling systems, customer service centers, walk-in centers and manual cash collections. Our strategic approach has always been one of innovation and continued improvement with a focus on delivering an outstanding customer experience and taking a leadership role in delivering 21st-century technology. We develop processes and implement tools to create an efficient customer-centric operation which ensures our clients' tolling customers receive a positive and consistent customer experience through every service channel. Our commitment to quality is reflected in our use of Lean Six Sigma principles, as well as our history of successful project transitions whether we are taking over an existing CSC facility or standing up a new one. Our dedication to continued improvement drives operational efficiency and accountability through exciting new technologies which are designed to deliver the ultimate customer experience. www.shimmick.com

The Stantec community unites approximately 22,000 employees working in over 400 locations across 6 continents. We collaborate across disciplines and industries to bring buildings, energy and resources, and infrastructure projects to life. Our work—professional consulting in planning, engineering, architecture, interior design, landscape architecture, surveying, environmental sciences, project management, and project economics—begins at the intersection of community, creativity, and client relationships. Since 1954, our local strength, knowledge, and relationships, coupled with our world-class expertise, have allowed us to go anywhere to meet our clients' needs in more creative and personalized ways. With a long-term commitment to the people and places we serve, Stantec has the unique ability to connect to projects on a personal level and advance the quality of life in communities. Stantec has over 35 years of specialized traffic and revenue forecasting experience. We are a leader in preparing managed lanes feasibility and investment grade studies. www.stantec.com

Founded in 2013, STAR Systems International (SSI) is a world leader in Automatic Vehicle Identification Technologies. SSI focuses on providing best-in-class transponders, readers and professional consulting services for Smart City Initiatives, including Electronic Tolling (ETC), Congestion/Road Use Charging, Electronic Vehicle Registration (EVR), Express/HOT Lane, Fleet Management, Parking and Secure Access Control applications. SSI is guided by three principles: Outstanding People, Innovative Products and Service Excellence. The Company strives to ensure customer success by leveraging its technical expertise and implementation experience. www.star-int.net

SPONSORS & EXHIBITORS

SWC brings proven experience in the highway toll, government, utility, telecommunications, cable, property management and education industries. Over the past 40 years, we have partnered with numerous clients to maximize the management of their accounts receivable, annually managing billions of dollars. From large Fortune 500 companies to small organizations, SWC has a proven history of connecting to understand the client's challenges, developing solutions that resolve receivables concerns, and delivering desired results. In addition to tradition accounts receivable management, SWC has also provided staff augmentation and 1st party customer service activities specifically in the tolling market. SWC also developed a guaranteed toll solution for video transactions, known as TollMaxx (tollmaxx.com). TollMaxx offers toll agencies the opportunity to leverage the capabilities and efficiencies of large volumes to reduce cost, eliminate collection risks and improve customer experience! www.swcgroup.com

TollPlus is an innovative and proven company providing a sophisticated end-to-end toll management solution that is scalable, lightweight, secure, and highly configurable to address the challenges of the electronic toll collection and mobility markets. Driven by passion to help our customers evolve and provide an enhanced customer experience, TollPlus' marquee product ToP-BOS™, provides Back Office Systems (BOS) focused on accuracy and accountability while processing extremely high transaction volumes. Our BOS platform handles a "One Account" concept to facilitate Mobility as a Service (MaaS) and support various multimodal solutions. In a rapidly-changing environment, TollPlus maintains a strong focus on technology and continuous R&D to offer world-class level products and services. These solutions are developed using trailblazing technologies that concentrate on significantly improving transportation agency efficiencies by reducing operating expenses and maximizing revenue – all while providing exceptional customer service to our global clients. TollPlus maintains offices in Texas, India, and Ireland. www.tollplus.com

TransCore provides fully-engineered transportation solutions for Tolling and Traffic Management systems. A pioneer in tolling, we provide full-scale operations and maintenance services for nearly half of all U.S. toll lanes and currently constructing the first Congestive Pricing Tolling System in the U.S. Our flagship Infinity Digital Lane System® is a complete roadside toll collection solution, and our Integrity Back Office system combines advanced financial management software with 30 years of proven customer service excellence. We design and deploy traffic management systems for agencies across North America, and currently manage more than 30,000 intersections worldwide. Our history of supporting the transportation industry dates back to the early 1930s with the country's first toll road in Pennsylvania, and in the 1980s with the development of RFID transportation applications at Los Alamos National Labs. Our RFID systems provide secure and interoperable access for airports, hospitals, parking garages, and the toll and rail industries. www.transcore.com

Verra Mobility is a global leader in smart transportation with a focus on smart cities, smart roadways and the connected systems that tie them seamlessly together. www.verramobility.com

WSP USA (formerly WSP | Parsons Brinckerhoff) provides a wide range of technical and management consulting services to owners, developers and operators of the toll industry. Services include strategic consulting, innovative financing, economic forecasting, analysis, planning, design, and operations & maintenance. WSP USA is the U.S. operating company of WSP, one of the world's leading engineering and professional services firms. Dedicated to serving local communities, we are engineers, planners, technical experts, strategic advisors and construction management professionals. With more than 7,000 people in 100 offices across the U.S., we partner with our clients to help communities prosper. www.wsp.com

GOLD SPONSORS

Amazon Web Services (AWS) Worldwide Public Sector helps government, education, and nonprofit customers deploy cloud services to reduce costs, drive efficiencies, and increase innovation. State and local government transportation agencies are leveraging AWS to improve the safety and performance of transportation networks. Whether your focus is on agency modernization, resiliency, or cost savings, AWS has dedicated teams to help you pave the way for innovation and, ultimately, make the world a better place through technology. <https://aws.amazon.com/stateandlocal/transportation>

CSG is a leader in innovative customer engagement, revenue management and payments solutions that make ordinary customer experiences extraordinary. Our cloud-first architecture and customer-obsessed mindset help companies around the world launch new digital services, expand into new markets, and create dynamic experiences that capture new customers and build brand loyalty. For nearly 40 years, CSG's technologies and people have helped some of the world's most recognizable brands solve their toughest business challenges and evolve to meet the demands of today's digital economy with future-ready solutions that drive exceptional customer experiences. With 5,000 employees in over 20 countries, CSG is the trusted technology provider for leading global brands in telecommunications, retail, financial services and healthcare. Our solutions deliver real world outcomes to more than 900 customers in over 120 countries. To learn more, connect with us on LinkedIn and Twitter. www.csgi.com

BREAKFAST SPONSOR

Parsons (NYSE: PSN) is a leading technology firm driving the future of critical infrastructure, defense, and intelligence. By combining unique technologies with deep domain expertise across cybersecurity, missile defense, space, connected infrastructure, and smart cities, we're providing tomorrow's solutions today. For decades, Parsons has helped the world move smarter through integrated technology solutions that help cities improve mobility as safely, sustainably, and efficiently as possible. With a history of disruption beginning in 1944, we apply our distinct perspective to help our customers confront the issues of tomorrow in every domain—land, sea, air, space, and cyber. Our range of capabilities and our global network of resources lets us layer and integrate solutions to respond to any challenge with unmatched agility. In a time of rapid change, we see infinite sources of inspiration to fuel our creativity and enable the innovation necessary to accomplish our quest of delivering a better world. www.parsons.com

Our firm will locate and contact your citizens in a persistent and professional manner, ultimately allowing more dollars to reach the bottom line. www.harriscollect.com

Booth 416

INEX Technologies has responded to industry needs by leveraging nearly 25 years of vehicle-based imaging processing to bring to market a video-based roadside toll zone management system. The two most requested features were the ability to be non-intrusive (no in-ground sensors) and economical for new toll lanes. The RoadView™ system delivers all key transaction metrics – for example: transaction generation, virtual toll zone triggering, AVI association, classification, axle counting, and license plate reading/enforcement. Since HOV enforcement (people counting) is another commonly requested feature, we have incorporated that into RoadView as well! All this with our growing list of satisfied Tier-1 and Tier-2 clients serving as important references, clearly shows that INEX is more than just a LPR provider. www.inextechnologies.com

Booth 404

InfoSend is a Billing Service Provider utilizing the most advanced approach to offer innovative solutions for organizations seeking eBilling, ePayment, Data Processing, and BillPrint & Mail services. Traffic Sensor Solutions LLC is the distributor in the USA for the Sensor Line GmbH Fiber Optic Treadles and Sensors. Sensor Line's unique fiber optic sensing technology allows the most accurate and reliable and thus most cost-effective vehicle detection and classification sensor for traffic monitoring. These sensors are used both for open road tolling and at plazas for toll roads, bridges and tunnels. Working with light attenuation as the means of detection, these sensor will give accurate counts at any speed. Manufactured in Germany, the sensors have been designed so that they are backwards compatible with many of the existing interfaces as well as being able to fit into existing frames already installed. Versions are available to fit directly in the road or shoulder so that they can conform to the road profile and never missing a vehicle. Sensor Line is now an International Road Dynamics, Inc team member.
