

Revision	Revised By	Revision Notes
20190128	M. Kolb	Created.
20190129	B. Jewell	<p>Added the following detail from MK's email:</p> <p>The spreadsheet has two tabs:</p> <ul style="list-style-type: none"> • Plate Type – lists the DMV defined plate types for select states. The E-ZPass Group does not track this against all 50 states and also cannot vouch for the long-term accuracy of this data. For NIOP purposes, we will need to encourage individual states to keep on top of this with their own DMV and update accordingly. It should also be noted that NY technically has plate types for many other types of plates. However, the NY DMV only requires plate type (due to potential plate duplication) for plates whose content is a 1-5 digit number. Plates with alphas or 6+ digits are unique/not duplicated and, hence, do not really require plate type. There are some plate types that are not shown and indicate as “not available for general lookup”. These represent plates that are not stored by the DMV in their normal DMV database and are either not available for lookup at all or are only available via alternative lookup methods. However, for the purposes of hosting these plates on an ETC account, it may be necessary for the toll agencies to create a “plate type” for these plates. • No Type – lists states that do not have plate type. Note that NY is listed here as well with a note regarding the caveat above.
